DETAILED ACTION

The amendment and remarks filed 3/12/07 have been acknowledged and entered.

Claims 1-20 have been cancelled. Claims 21-40 are pending.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 21-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 21, 22, lines 8, 9, "the presence" and "living organisms" lack antecedent basis.

In claim 22, line 6, "means (2) for thereafter subjecting at least a portion of the cleaning ---" is indefinite and confusing term, because "2" refers to "processing unit. It is not clear how "2" can be used to describe the processing unit and the means for subjecting a portion of the cleaning fluid to at least partial sterilization.

In claim 23, line 2, "the means (12)" lacks antecedent basis.

In claim 29, line 5, and claim 30, line 3, "the chamber (2B, 2B2)", the "2B2" lacks antecedent basis.

In claim 33, line 5, "the connection channel" lacks antecedent basis.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21-26, 32, 34, and 38-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over McClure et al. (6,451,125) in combination with Rivelli et al. (5,254,246).

McClure et al. disclose a process and apparatus for cleaning pieces. See the abstract, Figs. 1, 3, col. 3, line 32-col. 7, line 32, and the claims.

McClure et al. do not teach the sterilization as claimed.

Rivelli et al. disclose water reclamation system. The reference discloses using sterilization to remove the microorganisms. See the abstract, and the claims.

It would have been obvious for one skilled in the art to use the sterilizer taught by Rivelli et al. in the McClure et al. system to improve the cleaning process.

Response to Arguments

5. Applicant's arguments, see applicant's remarks, page 1, lines 1-22, filed 3/12/07, with respect to claims 1-20, the objections to the specification, and the drawings have been fully considered and are persuasive. The rejections and the objections of the claims, the specification, and the drawings have been withdrawn.

6. Applicant's arguments with respect to claims 21-40 have been considered but are moot in view of the new ground(s) of rejection.
